

SNOW & NEALLEY

QUALITY HAND TOOLS SINCE 1864

◆ Axes & Mauls ◆ Garden Tools ◆ Woodworking Tools ◆ Woodsmen's Tools ◆

For over 130 years people who work the land have depended on Snow & Nealley tools. From the farmers and woodsmen who helped build our country. . . to today's gardeners, outdoor enthusiasts, and woodcraft hobbyists, our tools continue to be the choice of those who want true quality.

Every tool we make is forged out of our own brick furnaces, sharpened by hand on our stone grinding wheels and then carefully assembled in our factory on the west bank of the Penobscot River. Each tool blends high carbon steel with native Maine ash, rock maple, and other select hardwoods to achieve the ultimate in durability and ease of function.

We now invite you to look through this product brochure and discover the tools made with a strength and integrity as true as the land they are made to work. These are the authentic tools that will make your gardening and woodworking easier and more enjoyable.

The tools that last for generations.

100% American Made

Camping Axes & Mauls

Belt Axe #014

The perfect lightweight camping axe for the outdoor enthusiast. Designed especially for hiking and camping. Features a 1^{1/4} lb. head with a 15" handle.

3-lb. Mini Maul #952

The perfect splitting tool for smaller jobs, this Maul can be used with one hand. Its unique design features a 3 lb. head on an 18" handle. The 3-lb Mini Maul can also be purchased together with the Hudson Bay Kindling Axe in our Split 'n Kindle Set. (See opposite page.)

Hudson Bay Kindling Axe #011

This axe is ideal for one-hand use in splitting kindling wood: at home, at camp, at the lodge, or at the condo. With a 1^{3/4} lb. Hudson Bay head on an 18" knobbed handle, it's light and easy to use.

7-lb. Splitting Maul #950

Specially designed to make wood splitting easier. Unique contouring from mid-head to blade forces the wood apart once it's set into the log. Handle length: 32"

Hudson Bay Camping Axe #012

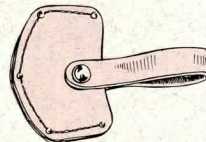

This axe was originally designed for trappers, hunters, and fishermen on expeditions along the Hudson Bay. Its lightweight head made it easy to carry. Its 24" handle gave it the versatility outdoorsmen needed. Today, whether pounding tent stakes or for more traditional uses, it's the favorite of outdoor enthusiasts everywhere. Features a 1^{3/4} lb. head on a 24" handle.

Belt Axe Sheath #076

Hudson Bay Sheath #077

Maul Blade Guard #075

For more axes, see inside back cover.

This catalog represents a selection of many of our fine tools. For more information about Snow & Nealley tools not shown in this catalog, ask your retail dealer or call us.

Gift Sets

These two items offer our most popular & versatile tools in attractive full color packaging.

Split 'n Kindle Set #010

It's a great combination, with the 1^{3/4} lb. Kindling Axe and the 3 lb. Mini Maul. Both are hand forged from high carbon steel like all our axes and mauls, and designed for a lifetime of use. The Split 'n Kindle Set is an ideal gift item for any homeowner or outdoor enthusiast.

Garden Tool Gift Pack #1012

This set includes our Transplanting Trowel, Claw, and Cape Cod Weeder, plus a rugged tool bag for storage, all in an attractive package. The Garden Tool Gift Pack is a great item for every gardener.

Garden Tools

Garden Trowel #1028* ①

A generously sized trowel with plenty of handle length. Lets you dig holes without scraping your knuckles!

Cape Cod Weeder #1018† ②

An updated version of the traditional New England favorite. A classic, simple design that can be used as a weeder, an edger, or for trimming and weeding around sidewalks and driveways.

The Claw #1013* ③

Three steel spring tines make a delicate, yet strong tool for hoeing around plants and flowers. The ultimate cultivator.

Transplanting Trowel #1029 ④

The curved, narrow blade, marked with inch increments, is specifically designed for setting and potting plants and bulbs.

Hand Dibble #962

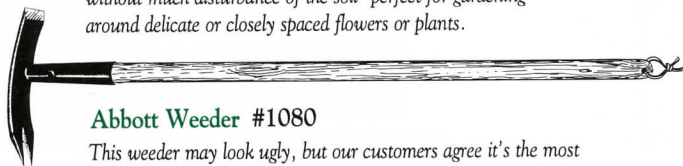

A traditional English tool used to punch holes in the ground for planting seeds, small bulbs, and seedlings. The forged steel point penetrates soil easily and can be rotated to enlarge the hole.

Weed Slicer #1020† ⑤

The Weed Slicer is carefully designed to cut off weeds at the root without much disturbance of the soil--perfect for gardening around delicate or closely spaced flowers or plants.

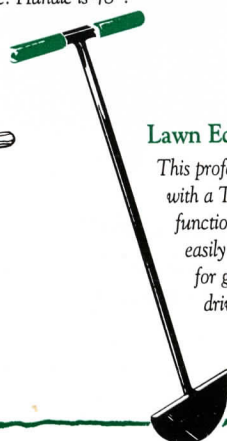

Abbott Weeder #1080

This weeder may look ugly, but our customers agree it's the most functional weeder on the market! Simply target the weed with the forked end, pierce the soil, then roll back the tool onto the other end . . . or just pull up. Any divots can be tamped down with the flat blade. Handle is 48".

Lawn Edger #1038

This professional lawn edger is designed with a T-handle for comfort and ease of function. Its beveled metal edge cuts easily into soil or sod. An ideal tool for grooming around lawns, driveways, walkways and gardens.

Giant Claw #1060

This rugged, versatile tool is composed of three hard carbon steel spring tines on a strong 48" ash handle. Excellent for cultivating in large flower beds and vegetable gardens.

Heart Hoe #1015[†] ⑥

A unique tool that's wonderful for gardening in small flower beds, herb and rock gardens, and containers.

Hand Bulb Planter #1030

Our bulb planters are stronger than any others. The Hand Bulb Planter has a 5" deep cone, and has a 2^{1/2}" opening at the bottom. It's large enough for any type of bulb.

The beveled edge cuts soil easily season after season.

Hoe 'n Pick #966

The Hoe 'n Pick was specifically designed for hoeing tough soil. The hoe end can also be used for loosening soil or even chopping roots, while the pick can be used for drawing seed lines or dislodging small rocks. Handle is 36".

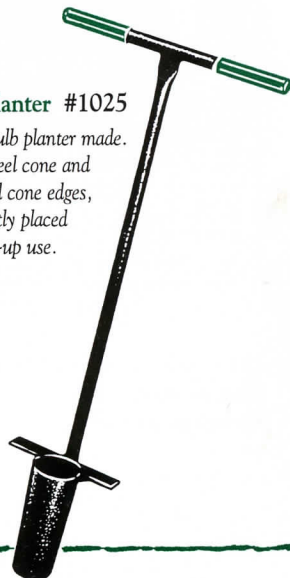

Pick a' Hoe #965

A multi-purpose tool designed for breaking up soil or weeding. The pick end is also effective for dislodging small rocks. Handle is 18".

Long Handled Bulb Planter #1025

This is the most functional bulb planter made. Features a 7" deep carbon steel cone and a wide 2^{1/2}" opening. Beveled cone edges, unique T-handle, and perfectly placed foot pedals allow easy, stand-up use. Handle is 36".

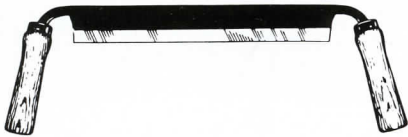

*Also available with a 24" handle. †Also available with a 24" or 48" handle.

Woodworking Tools

10" Draw Shave #890

Our most popular draw shave because of its exceptional versatility. Large enough to use on logs, yet small enough for use in the furniture and craft trades.

13" Draw Shave #882

This draw shave is best suited for working on large jobs. It makes stripping the big logs easier, and is often used in building log homes.

8" Wood Carver #889

This smaller draw shave is excellent for the fine woodworking required in furniture making and other crafts.

13" Curved Draw Shave #884

Like the 13" straight Draw Shave, this is a tool designed for working on large jobs. The curved blade is useful in preserving the contour of the log.

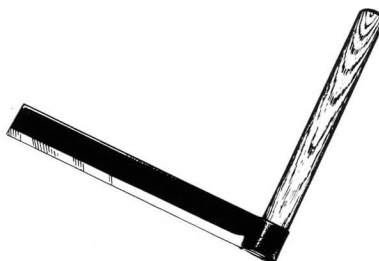

5" In-Shave #886

This tool has many applications, including rough shaping of furniture and fence posts.

Wood Gouge/Bark Spud #902

Great for peeling logs or rough gouging of wood. Tool has a 2" blade and an overall length of 21^{1/2}".

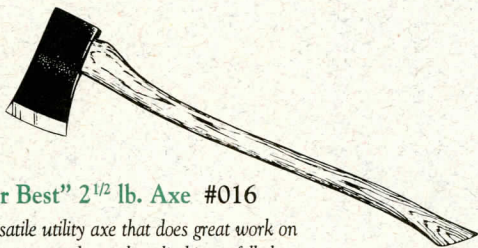

Shingle Froe #904

This is the perfect tool for splitting shakes or making shingles.

Our Woodworking Tool Display Board is one of the quality Snow & Nealley displays you'll find in fine retail stores throughout the U.S.

More Axes

"Our Best" 2 1/2 lb. Axe #016

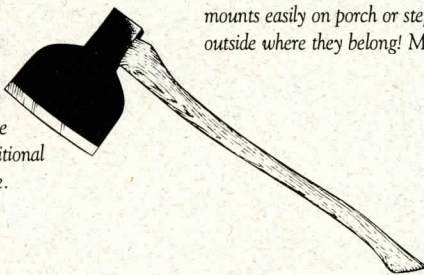

A versatile utility axe that does great work on fence posts, garden stakes, limbing a felled tree, and all sorts of other practical jobs around the home. Handle is 28".

"Our Best" 3 1/2 lb. Axe #026

The woodsman's favorite. This classic single bit axe is perfect for big jobs. Fitted with a 30" handle for greater leverage.

Broad Axe #030

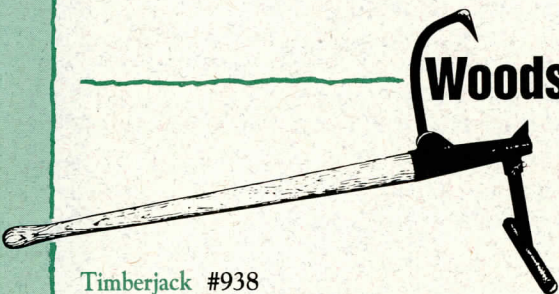

America's earliest settlements were built with the Broad Axe. It was used to square rough timbers into posts and beams for cabins, and even for fence posts. Today this unique axe still serves those traditional functions. Features a 5 lb. head with a 34" handle.

Old Fashioned Boot Scraper #1000

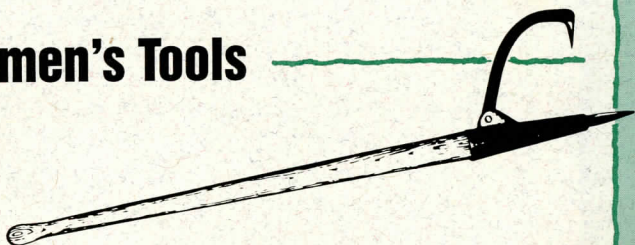

No American home is complete without this traditional piece of Americana: the authentic, hand forged iron boot scraper. With a design based on an old New England classic, ours mounts easily on porch or steps--so you can keep dirt and mud outside where they belong! Mounting hardware is included.

Woodsmen's Tools

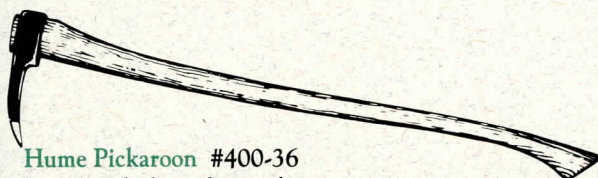

Timberjack #938

The Timberjack both turns the log and holds it up off the ground for easier and safer cutting. Indispensable for cutting logs into splitting lengths for firewood.

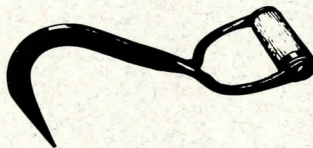

Cant Dog (Peavey) #150

The original log rolling tool by Snow & Nealley.

Hume Pickaroon #400-36

Great for unloading and moving logs.

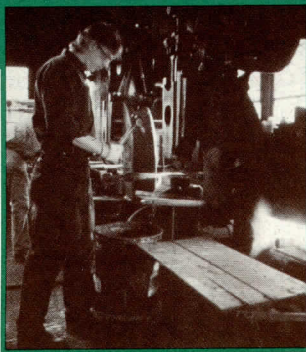

Abbott Pulp Hook #090

For ease of handling smaller lengths of wood.

What's a Lifetime Warranty?

"Lifetime warranty" is a very popular term in the tool business these days. Just about everyone says their tools come with one.

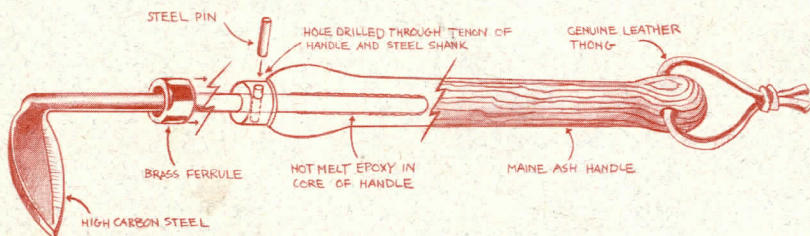

At Snow & Nealley, we have our own kind of lifetime warranty. We've had it for 130 years. But it's not a policy on paper. It's the way each tool is made, the quality of the components from which it's made, and the skill of the craftsmen who make it. In fact, our kind of lifetime warranty is good for more than just one lifetime--ask anyone who's using the same Snow & Nealley axe or maul his grandfather bought 90 or 100 years ago. Of course, if anything ever does happen to your Snow & Nealley tool in the course of normal use, we'll replace it.

Family Owned and Operated
Since 1864.

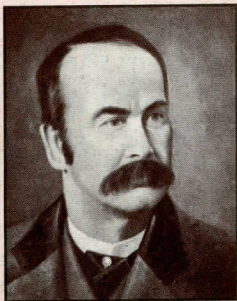

The making of a Cape Cod Weeder.

"The tools that last for generations" is more than just a slogan. Every tool we make is literally built to last for more than a single lifetime--to become a tool that fathers and sons, mothers and daughters, can use and pass on from one generation to the next.

Take the Cape Cod Weeder, for example. We start with native Maine ash handles and high carbon steel hand forged in our brick furnaces. The handle is drilled to receive the shank of the metal forging, and hot melt epoxy with special steel and wood adhesive properties is inserted into the core of the handle. After a brass ferrule is slipped onto the steel shank, the shank is inserted into the handle. A hole is then drilled completely through the tenon of the handle and the steel shank, into which a steel pin is driven to secure the assembly. The brass ferrule is then pulled down over the tenon and crimped tightly in place. Finally, we tie the leather thong through the end of the handle to complete the assembly.

Of course, we use different assembly processes for different tools. But, like our Cape Cod Weeder, each is made to give you a skillfully designed, carefully crafted tool that will last you and your family for generations to come.

Edward Bowdoin Nealley

Snow & Nealley is very proud of its 130-plus years in business, and we would like to thank you, our customers, and the efforts of the five generations of the Nealley family who have guided our company through the years: Edward Bowdoin Nealley, who founded Snow & Nealley in 1864; William Pope Nealley, who kept the business running through the Great Depression; Edward Bowdoin Nealley II, who continued the business through World War II; and William Bowdoin Nealley, who took the reins during an era of increasing international competition. Also, special thanks to our current President, Lois Nealley, who has ensured that the Snow & Nealley tradition of quality remains uncompromised.
